

**GTUA/City of Krum**

**Water Well Construction Project**

**Wholly Funded by: Texas Water Development Board**

**Drinking Water State Revolving Fund**

Project involves construction a 250 to 300 gpm water well at the Masch Branch Water Delivery Site.

The project addresses the production capacity lost by the abandonment of Well #5, which was abandoned due to its location within 500-feet of a solid waste disposal site. In addition, the City of Krum is under TCEQ Enforcement Order for 23% deficiency in water supply capacity for the largest pressure plane of its water system. This project, in conjunction with combining the system into one pressure plane, and purchasing additional water supply capacity from UTRWD, is intended to address this deficiency.
